Ecolon Coating

Ecolon coating

Ecolon is Neoflam's superior nonstick ceramic coating solution. Dedicated to consumer & environmental health, Neoflam has created Ecolon from the Earth's natural, sustainable minerals.

Superior Durability

Ecolon coating inside and outside the cookware gives excellent scratch resistance sustaining superior durability.

Safe

Ecolon coating uses earth's natural substances. It is free of harmful chemicals and toxic fumes.

Easy to clean

Ecolon coating is a professional grade non-stick ceramic coating and facilitates convenience in cleaning.

Easy Slide Lock

You can safely and easily open the lid anytime with the side handles, without waiting for the steam to release to add or stir ingredients.

How to Use:

Double Safety Lock System

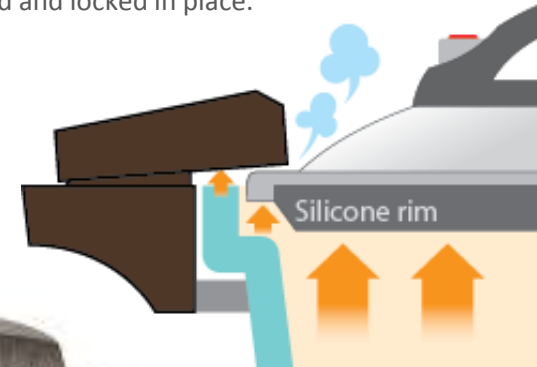

Steam Release Vent

When pressure begins to build, the Steam Release Vent controls the internal pressure and safely releases the steam.

Safety Lid Lock Handles

The double safety locking system is equipped to prevent any rise in pressure if the lid is not completely closed and locked in place.

Save Time & Energy

Double Safety Lock System of the low pressure cooker helps force liquid and moisture into the food quickly which allows to cook food faster and tender. Also, a sealed pot with a lot of steam inside makes the food incredibly juicy and flavorful.
